With twenty years' experience of natural history, documentary and factual entertainment film making, excellent storytelling combined with superb technical expertise allows me to quickly deliver both high quality and creativity to the edit.

Having great respect for the work before the edit I work tirelessly to achieve the absolute best for both the subject matter and the footage.

Whether it is creating blue chip landmark films, challenging location edits, scripting, edit producing, grading, or overseeing delivery for primetime national television series I take pride in helping deliver outstanding and compelling content for my clients.
