About Me

I am a versatile and creative Bristol based offline editor with years of experience in editing and directing. I have done documentary, drama, news and comedy, working to tight deadlines on both quick turnaround and longer schedules.

My strengths are storytelling, structure and pacing. I am very organised and have a calm, diplomatic presence, happy collaborating or working alone on Avid or Premiere.

As well as the following programmes, I have also cut many trailers, promos and sizzlers for BBC Earth, Freeborne Media and Brian Leith Productions and worked as a finishing editor on Blue Chip shows such as Blue Planet II and Planet Earth III.
